Dementia Care Principles - Level 2 Certificate

This qualification aims to assist learners in developing their knowledge and understanding of the principles of caring for those with dementia.

This course covers areas such as person-centred care, the influence of positive communication methods, issues relating to the use of medication for those with dementia and the importance of providing appropriate activities.

The qualification doesn't infer competence in the work role but can be used to support the underpinning knowledge and understanding needed for those working in or towards a dementia care role.

- Unit 05 Understand the administration of medication to individuals with dementia using a person-centred approach
- Unit 06 Understand behaviour in the context of dementia
- Unit 07 Understand the benefits of engaging in activities in social care
