

# Website Development

In this course, you will analyse existing websites and evaluate their design and effectiveness.

You'll work with scripting languages such as HTML, CSS, and JavaScript, using a text editor or rapid application development tools. The course will also guide you through a testing and review process to assess website design and functionality.

This course is essential for those aiming to build a career in website development, as it equips you with key web-client development skills that are valuable for software developers, database experts, and systems managers.

## WHAT WILL I NEED?

Please be prepared to provide your residency documents such as a passport, EU citizen ID card, UK Birth Certificate or Biometric Card. If you have been in the UK for less than 3 years or have entered the UK with a visa you will need to provide evidence that you are eligible to study in the UK - your visa, your biometric card that covers the duration of your course or any relevant home office documents to support your residency should all be provided. If you're an EU, EEA or Swiss citizen we will need to see evidence of 'Pre-Settled' or 'Settled-status' documents. Also for funding purposes we would need to see evidence of payslips if working (within the last 3 months). If you are receiving benefits (e.g JSA, ESA, Universal Credit (UC), Housing benefits etc. please provide evidence of this).

## WHAT CAN I DO AFTER?

On completion of this course, you can progress onto further study in this area.
