

Retrofit and Energy Assessment - Skills Bootcamp for Londoners

Level 3 Certificate in Domestic Energy Assessment

About the qualification

This qualification is a professional qualification for those who wish to pursue a career as a Domestic Energy Assessor (DEA). Once qualified, DEAs register with an Accreditation Scheme which accredits them to produce Energy Performance Certificates (EPCs) for individual existing homes (not newly built). This is in accordance with legislation implementing the EU Directive on the Energy Performance of Buildings.

EPCs, energy ratings for homes similar to consumer-friendly 'fridge ratings', have been compulsory at the time of let or sale of domestic properties since 2008. EPCs can only be produced by qualified, accredited energy assessors.

Level 3 Certificate for Retrofit Assessors

About the qualification

This course covers how to assess dwellings for retrofit, identify improvement options, design and specify energy efficiency measures and monitor retrofit projects. Such retrofits are essential to help reduce the carbon emissions from homes and to help tackle climate change.

The ABBE Level 3 Certificate for Retrofit Assessors qualification has been developed to enable those working in the construction and built environment sector to take a qualification which covers the PAS2035 Retrofit Assessor role. The qualification will meet regulatory requirements and will use the Accreditation Schemes to produce the report.

Level 1 Award in Health and Safety in a Construction Environment

About the qualification

Start Date: 13 January 2025

Day: Monday - Friday

Time: 09:00 - 17:00

Duration: 5 weeks

Venue: Enfield Construction Skills Academy

Undertaking this standalone qualification will allow you to learn, develop and practice the skills required for employment and/or career progression at a construction site.

WHAT WILL I STUDY?

Level 3 Certificate in Domestic Energy Assessment

Course structure

- Unit 1: Conduct energy assessments in a safe, effective and professional manner
- Unit 2: Prepare for energy assessments of domestic property
- Unit 3: Undertake energy inspections
- Unit 4: Produce and explain Energy Performance Certificates relating to domestic property

Level 3 Certificate for Retrofit Assessors

This qualification is designed to cover all aspects of PAS2035 Retrofit Assessor role giving you the knowledge, understanding and skills to carry out an assessment and produce a condition report. It includes understanding the principles and standards of retrofit, the building structures, the appraisal of buildings, and the occupancy assessments, which are all essential in this role.

WHAT WILL I NEED?

This course is open to all London residents who meet the criteria of the Bootcamp. It is designed to help people gain more productive work, so all we ask is that you can commit to the training.

This is an academic qualification (Level 3) which will allow you to practice as a domestic energy assessor or retrofit assessor.

You will need to provide your own Laptop to work on.

Level 3 Certificate in Domestic Energy Assessment

The qualification is suitable for new entrants to the sector seeking to begin a career in energy assessment but also for those with experience in property inspection or surveying wishing to gain a qualification in energy assessment.

Level 3 Certificate for Retrofit Assessors

You may already be working in the built environment or construction sector. It will enable them to demonstrate the skills and knowledge they have gained through their employment allowing you to achieve a nationally recognised qualification.

Level 1 Award in Health and Safety in a Construction Environment

This qualification is for those wishing to qualify for CSCS UK Ltd Green Card to access construction sites in the UK as a non-skill.

Start Date: 13 January 2025

Day: Monday - Friday

Time: 09:00 - 17:00

Duration: 5 weeks

Venue: Enfield Construction Skills Academy

HOW WILL I BE ASSESSED?

Assessment entails a combination of online multiple-choice examinations and building a portfolio of evidence to show your competency skills in-house.

To achieve Level 1 Health and Safety in a Construction Environment, you must achieve an 80% Pass Mark from the mandatory units.

WHAT CAN I DO AFTER?

As part of this course, you will be offered an interview with a Good Work employer. From there you can progress into work or further training where needed.

Start Date: 13 January 2025

Day: Monday - Friday
